Interested in information on a particular product or service? Need to know which companies can help? Look no further than the 2012 Resource Guide, which can also be accessed at www.healthcare-informatics.com. With more than 280 listings and 146 companies, researching key vendors has never been faster or easier. We hope you will find this to be a valuable resource.
Tame the beast.

You’re ready to lead an information revolution in your hospital or health system, but are too busy managing server stacks and software installations. You want to deliver relevant data seamlessly to every point of care, but lack the integration needed to pull it off. You have a vision for scaling IT to support your organization’s growth, but don’t have the resources to make it a reality.

athenahealth offers cloud-based revenue cycle, EHR, patient-provider and care coordination services that help you turn data into decisions and information into insight. Our secure, HIPAA-compliant services require minimal resources to implement, scale and respond to change. We enable complete integration across inpatient, ambulatory and alternative sites. And we dispel that nagging fear of waking up one day to find your expensive software is suddenly...obsolete.

Beast tamed. Revolution under way.

Put the power of the cloud to work.
